# (r)markdown-paper-template

- paper.md is language agnostic
- article-skeleton.Rmd uses Rmarkdown and a custome template `lal-paper-template.tex`
    - forked from Steve Miller's template, which implements nifty features such as hyperlinks to footnotes and citations
    - added option to have separate title page `septitle` in yaml boilerplate
    - added option to centre-align title `titlecentre` in yaml boilerplate
    - added fancyheaders and added parameter to title paper `fancy-header` in boilerplate - comment out to restore non-fancy page layout
- pweave for python pending
